

## Sponsor Opportunities

Corporate Sponsors are welcome.

If your company currently sponsors a V8 Supercar and wants that representation extended to include one or more simulators, or even if your company is not a current sponsor but you would like to take advantage of our sponsored simulator program, then you should contact us immediately.

Our sponsored simulator program provides your company with advertising and promotion opportunities at racing, community and social events all over the world. Wherever our simulators are used, your sponsorship will be noticed and in addition to the public event exposure, your company can utilise its own sponsored simulator at corporate events and parties.

We will custom build the simulator for your company, we will have it painted and stickered to your specifications, we deliver it to your corporate functions and parties, we run it for you if required and pick it up again when you are finished.

When you are not using it, we will maintain it for you and increase your companies exposure by operating it at public events.

Sponsorship arrangements can be customised to suit your needs, please contact us for more information.
